Steve Nakada, Nakada+
523 West 6th Street, Suite 1006
Los Angeles, California 90014

RE: NOTICE OF DECISION – 3rd EXTENSION OF TIME, P2024-0163-ET
11469 Jefferson Boulevard in the Commercial General (CG) Zone

Dear Steve Nakada:

The Current Planning Division received your request on July 9, 2024 to extend the Extension of Time P2023-0195-ET and P2022-0192-ET, Conditional Use Permit P2019-0194-CUP, Site Plan Review P2019-0194-SPR, and Administrative Site Plan Review P2019-0194-AUP permitting the construction of a new five-story, 111,000 square foot, 175-room boutique hotel with a restaurant, pool, rooftop bar, and a two-level subterranean parking garage located at 11469 Jefferson Boulevard in the Commercial General (CG) zone. The request has been approved for an additional one-year term and said entitlements shall not expire until July 12, 2025.

Findings

In considering the request, the following findings were made:

1. On April 28, 2021, the Planning Commission approved entitlements, subject to all conditions of Planning Commission Resolution No. 2021-P003.
2. Condition No. 4 of Resolution No. 2021-P003 states:
“The land use permit to which these Conditions of Approval apply (the “Land Use Permit”) shall expire one year from the date of final approval of said Land Use Permit if the use has not been exercised. As provided in CCMC Section 17.595.030 – “Time Limits and Extensions”, an Applicant may request an extension of said expiration date by filing a written request with the Planning Division prior to the expiration of the land use permit.”
3. On May 11, 2021, two appeals were received, and the City Council held a public hearing on July 12, 2021 to consider the appeals. Resolutions denying each appeal and affirming the Planning Commission decision adopting the Mitigated Negative Declaration and Mitigation and Monitoring Program and approving the CUP, SPR, and AUP, subject to all the conditions of approval contained in the Planning Commission Resolution No. 2021-P003 dated April 28, 2021, were adopted by the City Council (Resolution No. 2021-R071 & 2021-R072). Therefore, the approval date for the entitlements is July 12, 2021.
4. The Applicant submitted two previous Extension of Time requests on June 14, 2022 and July 10, 2023. The requests state that the project was severely impacted by the COVID-19 Pandemic and subsequent affects on construction costs and interest rate rises. On July 21,

2022 and July 24, 2023, the City transmitted to the applicant, an approved Extension of Time through July 12, 2023 and July 12, 2024, respectively.

5. Since July 24, 2023, the Applicant has been in communication with the City regarding challenges in moving forward with the project due to construction costs and the lending market.
6. On July 9, 2024, the Applicant submitted a third Extension of Time request noting slow economic recovery that continues to affect commercial markets.

Analysis

Pursuant to CCMC Section 17.595.030.D.2, "The Burden of proof is on the applicant to establish, with substantial evidence, that the zoning approval should be extended. Upon determination that the applicant has made a good faith effort to establish the permit, the Director may extend the time to establish an approved permit for up to an additional 12 months, unless the conditions of approval authorize longer extensions...". The applicant intends to continue with the project but requires additional time to secure financing as economic markets improve.

Conditions of Approval

1. The Conditions of Approval outlined in Exhibit A (dated April 28, 2021), enclosed as Attachment No. 2, shall remain in effect for the remaining duration of the approval period.

Environmental Determination

Pursuant to the California Environmental Quality Act guidelines, a Mitigated Negative Declaration with associated mitigations was adopted by the Planning Commission on April 28, 2021. Pursuant to Section 15162 of CEQA, the extension request is within the scope of the adopted MND and the circumstances under which the MND was determined have not significantly changed and no new significant information has been found that would impact the CEQA finding. Therefore, no additional environmental analysis is required.

Appeal

This administrative decision may be appealed in accordance with Title 17, Section 17.640.030 – Appeals, by an interested person within 15 days of approval, by 5:30 PM. If no appeal is filed, the decision shall be come final. If a timely appeal is notified, staff will notify the applicant. Please contact Emily Stadnicki, Current Planning Manager, at 310-253-5727 or at emily.stadnicki@culvercity.org with any questions.

Sincerely,

Mark E. Muenzer
Planning & Development Director

Re: The Jeff Hotel, 11469 Jefferson Boulevard, Culver City, CA
Entitlement Extension Request

Dear Mr. Muenzer,

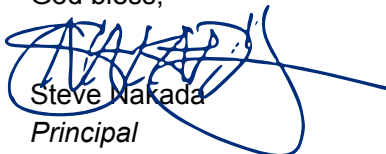

Per our 7/03 telecom with Emily Stadnicki, NAKADA+ ('Nakada'), as the Architect Of Record and China Trust Bank ('Owner'), is requesting a second entitlement extension for The Jeff Hotel ('Project') before the 12 July 2024 expiration date. This request is due to the slow economic recovery that continues to plague commercial markets, especially the hospitality sector —even quality higher-end projects that are fully-entitled. The same CTBC Title Report is attached.

As noted previously, the proposed Jeff Hotel is a new 111,000-SF, five-story, 175-room boutique hotel building with a restaurant and two-level subterranean parking structure at 11469 Jefferson Boulevard in the Commercial General Zone of Culver City. The project is located at the western boundaries of Culver City and adjacent to the Westfield Shopping Center, the Sunkist Park residential neighborhood and Playa Vista offices aka Silicon Beach is seen as a catalytic development for an aging commercial district. The project received full support from the Chamber of Commerce, the Planning Commission and the City Council and, after four town hall meetings, from the Sunkist Park community.

As noted during the entitlement process, this proposed hotel Project would provide a higher quality hotel option, local economic stimulus and significant city revenue. The Project was approved for Conditional Use Permit P2019-0194-CUP, Site Plan Review P2019-0194-SPR, Administrative Use Permit P2019-0194-AUP and with the adoption of a related Mitigated Negative Declaration (MND).

We believe these lingering economic challenges will pass with the recent signs of improvements and growth in other sectors. So with this entitlement extension request and the pending 2028 Olympics — Nakada will be taking a new development approach with a new developer, and if feasible, will eventually engage the City and the Owner. We are determined to bring this project, as entitled, to the neighborhood of Culver City. Thank you.

God bless,

Steve Nakada
Principal

RESOLUTION NO. 2021-P003

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF CULVER CITY, CALIFORNIA, APPROVING CONDITIONAL USE PERMIT P2019-0194-CUP, SITE PLAN REVIEW P2019-0194-SPR AND ADMINISTRATIVE USE PERMIT P2019-0194-AUP, FOR DEVELOPMENT OF A NEW 111,000 SF, FIVE-STORY, 175-ROOM BOUTIQUE HOTEL BUILDING WITH A RESTAURANT AND TWO-LEVEL, BELOW-GRADE PARKING GARAGE LOCATED AT 11469 JEFFERSON BOULEVARD IN THE COMMERCIAL GENERAL (CG) ZONE.

(Conditional Use Permit P2019-0194-CUP, Site Plan Review P2019-0194-SPR, and Administrative Use Permit P2019-0194-AUP)

WHEREAS, on August 1, 2019, Sandstone Properties, LLC (the "Applicant" and "Owner") filed an application for a Conditional Use Permit, Site Plan Review, and Administrative Use Permit to construct a five-story boutique hotel, (the "Project"). The Project site is legally described as Lots 30, 31, 32 of Tract No. 17531 in the City of Culver City, County of Los Angeles, State of California; and,

WHEREAS, to implement the proposed Project, approval of the following applications is required:

1. Conditional Use Permit No. P2019-0194-CUP: for the establishment of a hotel, to ensure compatibility, configuration, design, location, and potential impacts of the proposed use, and suitability of the use to the site and surrounding area; and

2. Site Plan Review No. P2019-0194-CUP: for a new 111,000 SF, five-story, 175-room boutique hotel building with restaurant and two-level, below-grade parking garage, to ensure the Project complies with all required standards and City ordinances and to establish all onsite and offsite conditions of approval necessary to address the site features and ensure compatibility of the proposed Project with the development on adjoining properties and in the surrounding neighborhood; and

1 3. Administrative Use Permit P2019-0194-AUP: for valet-assisted tandem parking,
2 alcoholic beverage sales for restaurant/bar, and outdoor dining to ensure compatibility,
3 configuration, design, location, and potential impacts of the proposed use, and suitability of the
4 use to the site and surrounding area; and

5 WHEREAS, pursuant to California Environmental Quality Act (CEQA) Guidelines a
6 Mitigated Negative Declaration has been prepared; and

7 WHEREAS, on April 28, 2021, after conducting a duly noticed public hearing on the
8 subject application, including full consideration of the application, plans, staff report,
9 environmental information and all testimony presented, the Planning Commission (i) by a vote
10 of 4 to 0, with one abstention, adopted the Mitigated Negative Declaration, in accordance with
11 the California Environmental Quality Act (CEQA), finding the Project will not result in potentially
12 significant adverse environmental impacts; and (ii) by a vote of 4 to 0, with one abstention,
13 approved Conditional Use Permit P2019-0194-CUP, Site Plan Review P2019-0194-SPR, and
14 Administrative Use Permit P2019-0194-AUP, subject to conditions of approval.
15
16
17

18 NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF CULVER
19 CITY, CALIFORNIA, RESOLVES AS FOLLOWS:

20 SECTION 1. Pursuant to the foregoing recitations and the provisions of Culver City
21 Municipal Code (CCMC), the following findings are hereby made:
22

23 **Conditional Use Permit**

24 As outlined in CCMC Section 17.530.020, the following required findings for a Conditional Use
25 Permit are hereby made:

- 26 **A. The proposed use is allowed within the subject zoning district with the approval**
27 **of an Administrative Use Permit or Conditional Use Permit and complies with all**
28 **other applicable provisions of this Title and the CCMC.**
29

1 The CCMC conditionally permits hotels within the General Commercial (CG) Zone. The hotel
2 will have 175 rooms requiring 138 parking spaces per the Parking Demand Analysis dated April
3 3, 2020 prepared by Crain & Associates. With the hotel requiring 138 parking spaces for guest
and employee parking, a total of 150 parking spaces will be provided, 12 more than required
by the Parking Demand Analysis.

4 The maximum building height for the CG zone is 56 feet, based on CCMC Section 17.220. As
5 noted in the CCMC, in non-residential zones, such as with the Project, architectural features
6 that are non-habitable design elements, such as spires, turrets, bell towers, cupolas, and
7 similar design elements shall be allowed up to a maximum of 13 feet and six inches of height
8 of a building and are limited to 15 percent of the total roof area. The proposed building would
9 reach up to 56 feet in height (with the mechanical equipment and screening reaching no higher
69 feet and 6 inches measured to the roofline), which would be within the height requirements
for projects in non-residential zones as stated in Section 17.220 of the CCMC.

10 As required under the Commercial Zero Setback Overlay Zone, the first story of proposed
11 buildings that exceed 750 SF shall have a zero setback from the street-facing property of any
12 street listed in Subsection 17.260.020.B. (i.e., Jefferson Boulevard and Slauson Avenue). No
13 changes to the Project Site's existing Zoning designations are proposed by the Project.
Consistent with the Commercial Zero Setback Overlay Zone, the Project has been designed
with zero setbacks along Jefferson Boulevard and Slauson Avenue.

14 **B. The proposed use is consistent with the General Plan and any applicable Specific**
15 **Plan.**

16 The Culver City General Plan designation for the Project Site is General Corridor which allows
17 for a range of small to medium scale commercial uses with an emphasis on community serving
18 retail, office, and service uses along major corridors. The General Corridor designation is
19 intended to support desirable existing and future neighborhood and community serving
20 commercial uses and housing opportunities that are compatible with nearby residential
21 neighborhoods. The proposed hotel is consistent with the intent of the General Corridor
designation in that the development will offer jobs, meeting services, and businesses that will
serve the immediate and nearby communities. No changes to the Project Site's existing
General Plan designations are proposed by the Project.

22 **C. The design, location, size, and operating characteristics of the proposed use are**
23 **compatible with the existing and future land uses in the vicinity of the subject**
24 **site.**

25 The Project's contemporary design includes a custom, glass curtain-wall that wraps the length
26 of the south-facing corner of the proposed building at the intersection of Jefferson Boulevard
27 and Slauson Avenue. The curtain-wall is designed as a sculptural skin composed of steel and
28 glass and is intended to reflect the surroundings of the Project Site. The Project would also
include stepped terraces and high planters as well as interior landscaping that can be viewed
by the public, which would further enhance the character of the proposed building. The south

1 and west elevations include a glass facade that wraps the length of the south-facing corner of
2 the proposed building at the intersection of Jefferson Boulevard and Slauson Avenue.

3 **D. The subject site is physically suitable for the type and intensity of use being**
4 **proposed, including access, compatibility with adjoining land uses, shape, size,**
5 **provision of utilities, and the absence of physical constraints.**

6 The hotel ground floor lobby would include food and beverage amenities, including a
7 destination bar and restaurant, a business tech center, and meeting spaces. A light well would
8 provide natural light and a view of the landscaped courtyard. The fifth level would include a roof
9 deck area with a swimming pool, and food and beverage amenities, including a destination roof
10 top bar. The second-floor guest rooms and meetings rooms would be organized around the
11 landscaped courtyard. The third through fifth floors features a fitness center and guest rooms
12 overlooking the courtyard, surrounding cityscape and landscaped terraces. These uses within
13 the CG zone are all permissible and typical uses and therefore are compatible with surrounding
14 commercial uses.

15 **E. The establishment, maintenance or operation of the proposed use will not be**
16 **detrimental to the public interest, health, safety, or general welfare, or injurious**
17 **to persons, property, or improvements in the vicinity and zoning district in which**
18 **the property is located.**

19 Pedestrian areas would be well lit for security. The proposed buildings would include accent
20 lighting to complement the building architecture. Lensed light-emitting diode (LED) downlights
21 would be integrated into the architectural canopies to provide appropriate light levels. Façade
22 lighting is intended to reinforce the architecture of the building and to provide a nighttime
23 presence for the Project.

24 For the 24-hour valet-assisted parking, a third party operator will manage the tandem parking
25 spaces proposed for the hotel. This will allow the security and convenience of vehicles entering
26 and exiting the site.

27 Site Plan Review

28 As outlined in CCMC Section 17.540.020, the following required findings for a Site Plan Review
29 are hereby made:

30 **A. The general layout of the project, including orientation and location of buildings,**
31 **open space, vehicular and pedestrian access and circulation, parking and loading**
32 **facilities, building setbacks and heights, and other improvements on the site, is**
33 **consistent with the purpose and intent of this Chapter, the requirements of the**
34 **zoning district in which the site is located, and with all applicable development**
35 **standards and design guidelines.**

1 The Project would redevelop a 33,813 square foot (0.78-acre) property located in the northwest
2 corner of the intersection at Jefferson Boulevard and Slauson Avenue. The existing single-
3 story commercial (retail/restaurant) building and associated asphalt-paved surface parking lot
4 would be removed as part of the Project. The Project would provide a total of approximately
5 67,030 SF in 175 hotel rooms, 8,536 SF of back-of-house, 14,783 SF of hotel amenities, 630
6 SF of bicycle parking and 18,842 SF of circulation, and 1,119 SF of loading area for a total
7 building area of 111,000 gross SF. In addition, 15,450 SF of open space area would be
8 provided, as well as 56,300 SF of subterranean parking area. As proposed, the Project would
9 meet those requirements for parking, site design, and open space.

10 Direct vehicular access to the parking area would be provided from an inbound-only driveway
11 on Slauson Avenue in the western portion of the Project Site, which would include two entry
12 drive aisles. The drive aisle closer to the hotel would serve as a passenger drop-off and pick-
13 up area. The second drive aisle would allow entering vehicles to access the parking ramp down
14 to the two subterranean parking levels. Access to the subterranean parking garage would not
15 be gate controlled. There would be two driveway exits onto the adjacent alley to egress onto
16 the surrounding roadway system. One exit driveway would be provided directly off the dual
17 drive aisles (which would merge into a single aisle approaching the alley), while the second
18 exit would provide egress for vehicles exiting the subterranean parking garage. Exiting vehicles
19 would be allowed to travel north or south along the public alley toward Berryman Avenue or
20 Slauson Avenue, respectively.

21 Pedestrian access would be provided from a pedestrian entrance on Jefferson Boulevard that
22 would lead to the hotel lounge and restaurant area. Pedestrian access would also be provided
23 from the ride share drop-off and accessed from Slauson Avenue.

24 Loading for large deliveries for the hotel and restaurant uses would occur in a designated
25 loading area located on site on the ground floor north of the subterranean parking structure
26 entrance. This loading area would be accessed from public alley.

27 The maximum building height for the CG zone is 56 feet, based on CCMC Section 17.220. As
28 noted in the CCMC, in non-residential zones, such as with the Project, architectural features
29 that are non-habitable design elements, such as spires, turrets, bell towers, cupolas, and
30 similar design elements shall be allowed up to a maximum of 13 feet and six inches of height
31 of a building and are limited to 15 percent of the total roof area. The proposed building would
32 reach up to 56 feet in height (with the elevator shaft reaching 69 feet and 6 inches in height),
33 which would be within the height requirements for projects in non-residential zones as stated
34 in Section 17.220 of the CCMC.

35 As required under this overlay zone, the first story of proposed buildings that exceed 750 SF
36 shall have a zero setback from the street-facing property of any street listed in Subsection
37 17.260.020.B. (i.e., Jefferson Boulevard and Slauson Avenue). No changes to the Project
38 Site's existing Zoning designations are proposed by the Project. Consistent with the
39 Commercial Zero Setback Overlay Zone, the Project has been designed with zero setbacks
40 along Jefferson Boulevard and Slauson Avenue.

1 **B. The architectural design of the structures and the materials and colors are**
2 **compatible with the scale and character of surrounding development and other**
3 **improvements on the site and are consistent with the purpose and intent of this**
4 **Chapter, the requirements of the zoning district in which the site is located, and with**
5 **all applicable development standards and design guidelines.**

6 The chosen architecture will be modern style with a monochromatic color palette. The building
7 will largely apply exposed concrete materials, light-colored brick, and smooth-stucco walls with
8 reflective glazing. Other features include decorative Juliet balconies, aluminum siding, and
9 textured concrete cladding panels. Light-colored brick and canopies are used to distinguish
10 the retail floor from the residential floors. Dark gray aluminum siding used in between stucco
11 wall applications compliment the retail façade awnings. Accent features can be found when
12 entering the building at the front and the rear with the use of wooden elements such as wood
13 soffits within the courtyard area and horizontal wood slates used for mechanical screening at
14 the drop-off/pick-up area.

15 **C. The landscaping, including the location, type, size, color, texture, and coverage of**
16 **plant materials, provisions for irrigation, and protection of landscape elements has**
17 **been designed to create visual relief, complement structures, and provide an**
18 **attractive environment and is consistent with the purpose and intent of this Chapter,**
19 **the requirements of the zoning district in which the site is located, and with all**
20 **applicable development standards and design guidelines.**

21 The Project would include a total of approximately 15,450 SF of open areas, which would
22 include a small 250 SF courtyard and a 500 SF outdoor dining area on the ground floor, a 2,800
23 SF terrace on the second floor, a larger 4,800 SF courtyard on the second floor, and an 2,000
24 SF pool deck and 5,100 SF lounge on the fifth floor. The courtyard areas on the ground,
25 second, and third floors as well as the dining area on the ground floor and the pool deck on the
26 fifth floor would be accessible to the public.

27 Several landscaping features are introduced along the western portion of the building for
28 purposes of softening the building as viewed from the adjacent residential neighborhood.
29 These include a "living green wall" at the upper levels of the hotel. The application of planters
with draping foliage along guest room balconies will also help address privacy and aesthetic
impacts for neighboring areas. At each floor of the hotel, a mixture of vertical planting and
planters with low-lying vegetation are placed within courtyards to break up hardscaping.

The stormwater runoff captured and stored within the rainwater harvesting system would be
reused for irrigation of proposed on-site landscape areas.

**D. The design and layout of the proposed project will not interfere with the use and
enjoyment of neighboring existing or future development, will not result in vehicular**

1 **or pedestrian hazards, and will be in the best interest of the public health, safety, and**
2 **general welfare.**

3 The Project would result in lane restriping along Slauson and Jefferson Boulevard, as described
4 above. The restriping is intended to decrease potential vehicle conflicts and improve traffic
5 conditions. There are no existing hazardous design features such as sharp curves or
6 dangerous intersections on-site or within the Project vicinity. The Project would also result in
7 some modifications to access (i.e., new curb cuts for the Project driveway).

8 The pedestrian access locations at the Project Site would be designed to City standards and
9 would provide adequate sight distance, sidewalks, crosswalks, and pedestrian movement
10 controls that meet the City's requirements to protect pedestrian and bicyclist safety.

11 The proposed building would reach up to 56 feet in height (with the elevator shaft reaching 69
12 feet and 6 inches in height) and would not exceed the maximum allowed height for the Project
13 Site of 56 feet. Roof mounted mechanical equipment (e.g., air conditioning, heating, exhaust,
14 and ventilation ducts, etc.) would be screened from public view from adjoining public streets
15 and rights-of-way. The method of screening would be architecturally compatible with other on-
16 site development in terms of colors, materials, and architectural style as approved by the City's
17 Planning Manager.

18 **E. The existing or proposed public facilities necessary to accommodate the proposed**
19 **project (e.g., fire protection devices, parkways, public utilities, sewers, sidewalks,**
20 **storm drains, street lights, traffic control devices, and the width and pavement of**
21 **adjoining streets and alleys) will be available to serve the subject site.**

22 Development of the Project in conjunction with the related projects would cumulatively increase
23 water demand on the existing water infrastructure system that is serviced by Golden State
24 Water Company. However, like the proposed Project, each related project would be subject to
25 City review to assure that the existing public utility facilities would be adequate to meet the
26 domestic and fire water demands of each project.

27 The City of Los Angeles has adopted an Integrated Resources Plan (IRP) that shows that the
28 HWRP will be able to accommodate growth within its service area to the year 2025. In addition,
29 the potential need for the related projects to upgrade sewer lines to accommodate their
wastewater needs is site-specific and there is minimal, if any, direct cumulative relationship
between the development of the Project and the related projects. Therefore, no significant
cumulative sewer infrastructure impacts are anticipated from the development of the Project
and the related projects.

It is anticipated that existing electricity, natural gas, and telecommunications facilities would be
sufficient to support the needs from the Project in combination with related projects.

Compliance with applicable SUSMP and long-term water quality requirements would be
reviewed by the Culver City Department of Public Works during the plan check phase of the

1 Project. Compliance with applicable stormwater requirements would ensure that development
2 of the Project would not violate any water quality standards or waste discharge requirements
3 or otherwise substantially degrade surface or groundwater quality.

4 **F. The proposed project is consistent with the General Plan and any applicable specific
5 plan.**

6 The Land Use Element of the City's General Plan designates this site and immediate
7 surrounding areas as General Commercial Corridor, which is consistent with the site's zoning
8 designation of CG. The Project is also consistent with the goals of the General Plan,
9 specifically, Objective 6 of the Land Use Element, which is intended to protect and enhance
10 residential and business uses within the Southern-Central Sub Area. Development of the
11 property with the residential/retail use is also consistent with Policy 6.B which encourages
12 intensities and qualities of commercial uses that are sensitive to their locations. In addition,
13 Policy 6.I emphasizes the need for streetscape improvements along commercial corridors.

14 **Administrative Use Permit**

15 As outlined in CCMC Section 15.530.020, the following required findings for an Administrative
16 Use Permit are hereby made:

17 **A. The proposed use is allowed within the subject zoning district with the approval of
18 an Administrative Use Permit or Conditional Use Permit and complies with all
19 other applicable provisions of this Title and the CCMC.**

20 Per CCMS Section 17.320.035.C.1.b.ii, within non-residential districts, tandem parking may be
21 provided for required parking spaces where authorized through an Administrative Use
22 Permit. The use of the tandem parking for non-residential uses shall require that the operator
23 of the parking facility provide a valet or attendant at all times that the parking is accessible to
24 users, except where the Director determines that the nature of the use and its operation will
25 not require attended parking. The Project Site would include valet-assisted parking on each
26 subterranean parking level in order to maintain safe and efficient use of the tandem spaces.

27 Per Section 17.400.015 an Administrative Use Permit is required for alcohol sales for
28 properties within 300 feet of residentially zoned property. As proposed, the request for on-sale
29 alcohol does not result in an undue concentration of establishments
dispensing alcoholic beverages. Additionally, the proposed use will not result in any adverse
impact on any adjacent or nearby residential uses, religious facilities, schools, libraries, public
parks and playgrounds, and other similar uses.

The proposed outdoor dining is located within the Commercial General (CG) Zoning
District. The Applicant proposes on-site outdoor dining in conjunction with the operation of
the proposed hotel restaurant and bar. Pursuant to Zoning Code Section 17.400.070, an
outdoor dining or seating area is permitted directly adjacent to the food service use, subject to

1 administrative review. The proposed use as conditioned will comply with all other applicable
2 Provisions of Title 17- Culver City Zoning Code and the Municipal Code.

3 **B. The proposed use is consistent with the General Plan and any applicable Specific
4 Plan.**

5 The Land Use Element of the City's General Plan designates this site and immediate
6 surrounding areas as General Commercial Corridor, which is consistent with the site's zoning
7 designation of CG. Additionally, the construction of a new 111,000 square-foot boutique hotel
8 with on-sale alcohol complies with all other regulatory documents on file with the City Clerk.

9 The proposed on-site consumption of alcoholic beverages is consistent with the "General
10 Corridor" General Plan land use designation because it is a small to medium scale commercial
11 use that serves the community.

12 The applicant is proposing onsite outdoor dining incidental to the operation of a boutique hotel.
13 The proposed onsite outdoor dining will meet the Citywide land use policy by "encourag[ing]
14 restaurants that feature outdoor dining, especially sidewalk cafes....." (Land Use Policy
15 6.E). The inclusion of outdoor dining will further meet the intent of the General Plan by
16 strengthening a local and regional uses within the surrounding area by providing a diversity of
17 uses for the local and regional community.

18 **C. The design, location, size, and operating characteristics of the proposed use are
19 compatible with the existing and future land uses in the vicinity of the subject site.**

20 A total of 82 tandem parking is proposed for the Project which comprises 55% of the total
21 parking provided. The remaining parking is anticipated for employees and users of the
22 amenities (i.e. conference rooms, restaurant). Based on the Parking Demand Analysis dated
23 April 3, 2020 prepared by Crain & Associates, a total of 138 parking spaces are required for
24 this type of use which was based on the location, size, and similar operations of neighboring
25 hotels. To allow this number of parking spaces within a horizontally constrained project site, a
26 two-level subterranean parking garage is being proposed. As such, tandem parking is being
27 requested as a method to maximizing the parking garage area.

28 The proposed on-site consumption of alcoholic beverages is compatible with the existing
29 commercial uses in the vicinity and have been conditioned to ensure compatibility with the
30 businesses. The proposed use meets all current planning, building, and fire codes so as to be
31 compatible with the existing and future commercial land uses in the vicinity of the subject site.
32 Should unexpected negative impacts arise from the conduct of the proposed use, this
33 Administrative Use Permit may be subject to revocation or modification as deemed necessary.

34 The proposed onsite outdoor dining will comprise 250 square feet of the restaurant and the
35 pool deck area all located within private property. The outdoor dining area will be compatible
36 with other restaurant and retail uses within the vicinity. Should unexpected negative impacts
37 arise from the conduct of the proposed use, this Administrative Use Permit may be subject to
38 revocation or modification as deemed necessary.

1 **D. The subject site is physically suitable for the type and intensity of use being**
2 **proposed, including access, compatibility with adjoining land uses, shape, size,**
3 **provision of utilities, and the absence of physical constraints.**

4 The Project Site is relatively flat and is approximately 15 feet above sea level across the
5 property. The Project Site is located in a highly urbanized area of Culver City and is currently
6 developed with a single-story commercial (retail) building and associated asphalt-paved
7 surface parking lot.

8 Direct vehicular access to the parking area would be provided from an inbound-only driveway
9 on Slauson Avenue in the western portion of the Project Site, which would include two entry
10 drive aisles. Access to the subterranean parking garage would not be gate controlled. There
11 would be two driveway exits onto the adjacent alley to egress onto the surrounding roadway
12 system. One exit driveway would be provided directly off the dual drive aisles (which would
13 merge into a single aisle approaching the alley), while the second exit would provide egress
14 for vehicles exiting the subterranean parking garage. Exiting vehicles would be allowed to travel
15 north or south along the public alley toward Berryman Avenue or Slauson Avenue, respectively.

16 The proposed on-site consumption is ancillary to the restaurant and bar contained in the hotel
17 and shall not change the site physically nor cause any measurable increase in parking demand.
18 The subject site is also found to be physically suitable for the proposed use subject to the
19 conditions of approval.

20 The subject property is physically suitable for the outdoor dining area proposed to be located
21 adjacent to the restaurant. The total square footage of outdoor dining proposed (250 sq. ft.)
22 inclusive of the pool deck area on the top floor and will not require additional parking for the
23 hotel. The subject use is compatible with surrounding commercial uses and is found to be
24 physically suitable for the proposed use subject to compliance with the conditions of approval
25 contained herein.

26 **E. The establishment, maintenance or operation of the proposed use will not be**
27 **detrimental to the public interest, health, safety, or general welfare, or injurious to**
28 **persons, property, or improvements in the vicinity and zoning district in which the**
29 **property is located.**

The Project would incorporate a 24-hour/seven-day video surveillance security program to
ensure the safety of its hotel guests, employees, and visitors. Site security features would
include building access/design to assist in crime prevention efforts and to reduce the demand
for police protection services. The Project design would include lighting of entryways and public
areas for site security purposes.

1 The proposed on-site consumption of alcoholic beverages shall serve the community by
2 providing ancillary restaurant offerings. The conditions of approval shall ensure the operation
3 of the proposed use shall not be detrimental to the public interest, health, safety or general
4 welfare or injurious to persons, property, or improvements in the vicinity and zoning district in
5 which the property is located.

6 The outdoor dining component will complement the hotel restaurant and bar and is consistent
7 with existing/future retail and restaurant uses in the subject building. The conditions of approval
8 will ensure that the operation of the onsite outdoor dining will not be detrimental to the public
9 interest, health, safety, or general welfare, or injurious to persons, property, or improvements
10 in the vicinity and zoning district in which the property is located.

 RESOLUTION NO. 2021-P003
 SPR P2019-0194, CUP P2019-0194, & AUP P2019-0194
 11469 Jefferson Boulevard

NO.	CONDITIONS OF APPROVAL	Agency	Source	Compliance Verification
GENERAL				
1.	These Conditions of Approval are being imposed on the Jeff Hotel (the "Project"), for the property located at 11469 Jefferson Boulevard (the "Property").	All	Standard	
2.	A copy of the Resolution approving the Project, and a copy of these Conditions of Approval, shall be printed on the plans submitted as part of any building permit application for the Project.	Current Planning	Standard	
3.	All building permit applications for the Project shall include sufficient information and detail to clearly reflect compliance with all applicable requirements of the Culver City Municipal Code (the "CCMC") and with these Conditions of Approval.	Current Planning	Standard	
4.	The land use permit to which these Conditions of Approval apply (the "Land Use Permit") shall expire one year from the date of final approval of said Land Use Permit, if the use has not been exercised. As provided in CCMC Section 17.595.030 –"Time Limits and Extensions", an applicant may request an extension of said expiration date by filing a written request with the Current Planning Division prior to the expiration of the land use permit.	Current Planning	Standard	
5.	Pursuant to CCMC Section 17.630.010.C.4 – "Posted Notice", the public notification sign(s) installed in accordance with the public notification requirements for the Land Use Permit shall be removed within ten days after the end of the appeal period or the final decision by the City Council on the Land Use Permit, whichever occurs last.	Current Planning	Standard	
6.	The Project shall be developed pursuant to CCMC Chapter 17.300 – "General Property Development and Use Standards".	Current Planning	Standard

	each have a minimum inside dimension of 10 feet x 12 feet, a gated opening that is at least 8 feet wide, and a 6 inch high by 6 inch wide concrete curb along the inside perimeter wall. Each enclosure shall also have at least a 6 inch thick concrete slab that drains at a one percent gradient out of the enclosure. Final approval for the size, location, and type of equipment needed for the adequate storage and disposal of all solid and recyclable waste generated by the Project shall be obtained from the City's Environmental Programs and Operations Manager. A fire suppression sprinkler system shall be provided within any covered trash enclosure area as required by the Fire Marshal. All refuse containers assigned to or otherwise used by the Project shall be stored on-site in the trash enclosures.	Works/ Fire/ Current Planning		
15.	All Project related solid and recyclable waste material handling shall be in accordance with CCMC Section 5.01.010 – "Solid Waste Management", which outlines the Sanitation Division's exclusive franchise for this service.	Public Works	Standard	
16.	For sites greater than or equal to 1 acre, applicant shall submit monthly SWPPP inspection reports to the City Engineer.	Public Works	Standard	
17.	Applicant shall develop the traffic signal design plans (if applicable) according to current standards and shall pay the City's vendor to 1) prepare the signal timing charts, and 2) implement the signal timing at the traffic signal controller for the pertinent signalized intersection taking into account signals coordination that may be in place along the corridor.	Public Works	Standard	
18.	Applicant shall repave the Alley, alley driveway approach and cross gutter full length of the frontage of the building per APWA Standards.	Public Works	Special

	grates per APWA Standards.	Works		
20.	Replace all sidewalk and curb ramps at building frontage to be ADA compliant.	Public Works	Special	
21.	Construction of full height sidewalk where driveways are being closed per APWA Standards.	Public Works	Special	
22.	The total area of the site to be redeveloped is approximately 33,800 SF. Since this exceeds 5,000 SF, a Standard Urban Storm Water Mitigation Plan (SUSMP) must be prepared.	Public Works	Special	
23.	An arborist report shall be prepared to address the health of the existing street trees and if they can withstand impacts of proposed reconstruction of adjacent curb, gutter, and sidewalk, or potential tree transplant or relocation. Should a tree(s) be removed, the applicant must provide two (2) trees for every one (1) tree removed, location to be determined by the City Engineer.	Public Works	Special	
24.	Jefferson Boulevard shall be repaved to the raised median along the project's frontage including the intersection of Slauson Avenue and Jefferson Boulevard. The repaving shall be a two-inch grind and overlay. Repaving shall include replacing existing traffic loop detectors.	Public Works	Special	
25.	The applicant shall provide a geotechnical report from a State licensed geotechnical engineer, as part of the Site Improvement Plan, reporting on the suitability of the onsite soils to support the proposed construction. The report shall also include a liquefaction analysis and a determination of the adequate pavement and base requirements for the drive aisles and parking areas. Core samples shall be taken to determine the existing thickness of the asphalt and base section of Jefferson Blvd and a recommendation, based on a calculated R-value	Public Works	Special

	improvement plan, a Local Storm Water Pollution Prevention Plan (LSWPPP) shall be submitted for review and approval by the City Engineer. The erosion control plan shall be developed and implemented in accordance with the requirements of the Los Angeles County Stormwater Quality Management Program, NPDES Permit No. CAS614001. The plan shall include the design and placement of recommended Best Management Practices (BMPs) to effectively prohibit the entry of pollutants from the construction site into the public street or storm drain system. The improvement plans shall note that the contractor shall comply with the "California Storm Water Best Management Practice Handbooks." Prior to the start of design of these plans and of necessary reports, the applicant's Civil Engineer shall meet with the City's Stormwater Program Manager to obtain information on the City-specific and LSWPPP requirements. The Storm Water Pollution Prevention Plan shall be submitted to the Engineering Division prior to any permit issuance. The Site Improvement Plans shall not be accepted for review unless the LSWPPP is included in the submittal package, including the plan check fee associated with the LSWPPP.	Works		
32.	This project proposes to redevelopment property that exceeds one acre. Therefore, prior to the issuance of Grading or Building Permits, proof of obtaining a General Construction Activities NPDES Permit from the State Water Resources Control Board via a Waste Discharger Identification (WDID) number shall be submitted. This will include the filing of a Notice of Intent (NOI) and Stormwater Pollution Prevention Plan (SWPPP) with the State. A copy of the SWPPP and WDID shall be provided to the Engineering Division prior to the approval of the LSWPPP.	Public Works	Special
